

Mayfair range of projector screens

3.0m to 4.0 WIDE WITH RADIO FREQUENCY REMOTE CONTROL

Truly a work of art. We use only the best quality materials and each one is tested at length before leaving the factory.

Although it is difficult to convey the screen quality online. The triple laminated glassfibre surface is designed to lay flat with no curls extending into the viewing area.

The gain is 1:1 which we consider best for modern projectors which have plenty of brightness. The viewing angle is very wide and the black border all around marks the image and improves your perception of the contrast ratio.

The screen fabric has black backing meaning you can place the screen in front of a window and no light will come through the projector screen fabric.

Fitting onto a plaster wall or ceiling is simplicity itself, thanks to the unique channel fix brackets. You will not find an easier screen to install.

The price of Sapphire Screens is comparable with many lower quality offerings.

All Sapphire Mayfair projection screens come with a remote control and *new stocks now have a zero volt contact closure built into the control box (request this if required at the point of ordering).*

These screens come with a 2.7m power lead from the back left of the screen (when viewed from the front) and terminates in a standard UK power plug.

The control box is approx half way along this cable.

All Sapphire Screens have a comprehensive 3 year warranty and the 4.0m wide models have Somfy motors with a five year motor warranty.

ELECTRIC	VIEWING SIZE (MM) (L+H)	SIZE (FEET) (L+H)	CASING (MM) (L+H+D)	ASPECT	Net Weight
SEWS300BV-A	3050 x 2286	10.05 x 7.48	3367 x 126 x 120	4:3	29.4kg
SEWS300BWSF-A10	3010 x 1881	9.87 x 6.16	3330 x 126 x 120	16:10	29.4kg
